Question: 1

Where are destination referenced during design time? Where are destination referenced during design time?

- A. xS-app.json
- B. manifest.yml
- C. xs-security.json
- D. package.json
- E. web.xml

Answer: A

Explanation:

See page 106, S4C80 Col17.

Question: 2

How can you provide in-app extensibility tools in an SAP S/4HANA cloud system?

Note: There are 2 correct answers to this question.

- A. Your user needs a business role with business catalog Extensibility (ID: SAP_CORE_BC_EXT)
- B. Assign yourself the Administrator business role (SAP_BR_ADMINISTRATOR)
- C. Assign yourself the extensibility business group (SAP_BASIS_BCG_EXT)
- D. Your user needs a business role with business catalog Extensibility (ID: SAP_BASIS_BC_EXT)

Answer: AB

Question: 3

Which statement regarding custom business objects is correct?

Select one

- A. Custom business objects (CBOs) refer to a self-contained type definition with a set of customer-specific fields that are coupled to SAP business contexts.
- B. The key user tool for custom business objects doesn't allow defining custom code lists that contain values for dropdown lists.
- C. Entities for custom business objects can be created and modified through a UI within SAP S/4HANA.

D. Custom business objects allow you to store arbitrary data in sap-specific tables. A custom business object first of all consists of a root node with a set of fields that can be freely defined using the key user tools.

Answer: C

Explanation:

Custom business objects (CBOs) refer to a self-contained type definition with a set of customer-specific fields that are NOT coupled to SAP business contexts.
