Question: 1

Identify the API that is not supported by Check Point currently.

A. R81 Management APIB.
Identity Awareness Web Services API
C. Open REST API
D. OPSEC SDK

Answer: C

Explanation:
Check Point currently supports four types of APIs: R81 Management API, Identity Awareness Web
Services API, OPSEC SDK, and Gaia REST API. The Open REST API is not a valid option. Reference: Check
Point APIs

Question: 2

SandBlast Mobile identifies threats in mobile devices by using on-device, network, and cloud-based
algorithms and has four dedicated components that constantly work together to protect mobile devices
and their data. Which component is NOT part of the SandBlast Mobile solution?

A. Management Dashboard
B. Gateway
C. Personal User Storage
D. Behavior Risk Engine

Answer: C

Explanation:
SandBlast Mobile has four components: Management Dashboard, Gateway, Behavior Risk Engine, and
On-Device Network Protection. Personal User Storage is not part of the SandBlast Mobile
solution. Reference: SandBlast Mobile Architecture

Question: 3

What are the different command sources that allow you to communicate with the API server?

A. SmartView Monitor, API_cli Tool, Gaia CLI, Web Services

B. SmartConsole GUI Console, mgmt_cli Tool, Gaia CLI, Web Services
C. SmartConsole GUI Console, API_cli Tool, Gaia CLI, Web Services
D. API_cli Tool, Gaia CLI, Web Services

Answer: B

Explanation:
You can communicate with the API server using three command sources: SmartConsole GUI Console, mgmt_cli Tool, and Gaia CLI. Web Services are not a command source, but a way to access the API server using HTTP requests. Reference: Check Point Management APIs

Question: 4

What makes Anti-Bot unique compared to other Threat Prevention mechanisms, such as URL Filtering, Anti-Virus, IPS, and Threat Emulation?

A. Anti-Bot is the only countermeasure against unknown malware
B. Anti-Bot is the only protection mechanism which starts a counter-attack against known Command & Control Centers
C. Anti-Bot is the only signature-based method of malware protection.
D. Anti-Bot is a post-infection malware protection to prevent a host from establishing a connection to a Command & Control Center.

Answer: D

Explanation:
Anti-Bot is a post-infection malware protection that detects and blocks botnet communications from infected hosts to Command & Control servers. It is different from other Threat Prevention mechanisms that prevent malware from entering the network or executing on the hosts. Reference: Anti-Bot Software Blade

Question: 5

Which TCP-port does CPM process listen to?

A. 18191
B. 18190
C. 8983
D. 19009

Answer: D

Explanation:

The CPM process is the core process of the Security Management Server that handles all management operations. It listens to TCP-port 19009 by default. Reference: CPM process
