Question: 1

Which TWO statements are true when enabling autonomous Data Guard on Autonomous Exadata. (Choose all correct answers)

- A. Autonomous databases inherit their Data Guard configuration from their Autonomous Container Database.
- B. Data Guard can be set per individual Autonomous Database within a Container Database.
- C. Data Guard is not currently supported on Autonomous Exadata Cloud@Customer.
- D. Autonomous Data Guard only supports Maximum Performance and Maximum Protection protection modes.
- E. When in a Data Guard configuration patching will always take place on the standby database first.

Answer: A, E

Question: 2

Which system configuration is offered by the Oracle Database Exadata Cloud Service?

- A. Each system configuration starts with a fixed amount of memory and storage resources.
- B. Each system configuration starts with a fixed amount of OCPU and storage resources.
- C. Each system configuration starts with a fixed amount of OCPU, memory, storage, and network resources.
- D. Each system configuration starts with a fixed amount of OCPU, memory, and network resources.

Answer: C

Question: 3

Which THREE are prerequisites for using the MySQL Database Service? (Choose all correct answers)

- A. You must create a tenancy and be able to sign in to it.
- B. You must download the latest MySQL version from <https://edelivery.oracle.com/>.
- C. You or your group must be granted the policies described in Mandatory Policies.
- D. You must install the downloaded MySQL version onto Oracle Cloud Infrastructure.
- E. You must create a compartment to store your resources.

Answer: A, C, E

Question: 4

When configuring connectivity for hosts in the VCN, security lists contain defaults for implementing security rules. Which TWO additional rules are needed for database systems? (Choose all correct answers)

- A. allows SQL*NET traffic from within the VCN
- B. allows ONS and FAN traffic from within the VCN
- C. allows SSH traffic from anywhere
- D. allows Path MTU Discovery fragmentation messages

Answer: C, D

Question: 5

Which three actions can you perform on a DB system that has an Oracle Data Guard association with a standby database?
(Choose all correct answers)

- A. If the primary database becomes unavailable, then you can use Oracle Data Guard to fail over the standby database to the primary role.
- B. You can write on both primary and standby databases because DB system standby databases in Oracle Cloud Infrastructure Database are logical standbys.
- C. You can terminate a primary database DB system.
- D. You can use the reinstate command to return a failed database into standby role after correcting the cause of failure.
- E. You can switch over the primary database to the standby role, perform maintenance on the standby database, and then switch it back to the primary role.

Answer: A, D, E
