Question: 1

A uni-directional link (hyperlink) is created in which situation?
Response:

A. a link is created from the content of an artifact to another artifact
B. a link is created from one artifact to another artifact of the same type
C. links are created from one artifact to multiple other artifacts
D. a link is created from a base artifact to an artifact in a module context

Answer: A

Question: 2

When an Artifact is reused in multiple Modules, which three property changes are reflected in all instances of the Artifact?
Response:

A. Workflow State
B. Comments
C. Links
D. Primary Text
E. Attribute values
F. Tags

Answer: A,D,E

Question: 3

When creating a collection, how can it be limited to specific artifact types?
Response:

A. add the desired artifacts to the preferred artifacts list
B. add any other artifacts to the collection's blacklist
C. add the desired artifacts to the collection's whitelist
D. collections cannot be restricted to contain specific artifact types

Answer: D

Question: 4

During the artifact import process, which practices should be followed to ensure data integrity and relevance?
(Choose Three)
Response:

A. Verifying the compatibility of the file format with the tool
B. Checking for data corruption during the import
C. Skipping the review process to speed up the import
D. Ensuring the imported data aligns with existing requirements

Answer: A,B,D

Question: 5

In the context of configuration management, what is essential for ensuring successful requirements reuse across multiple projects?
Response:

A. A flexible approach that allows bypassing configuration management protocols
B. Strict control mechanisms that track the lifecycle of each requirement
C. Limited visibility of requirement changes to stakeholders
D. Using outdated management tools to handle requirements

Answer: B

Question: 6

Which tool is used to customize the out-of-the-box document-style reports?
Response:

A. Report Builder (JRS)
B. Engineering Insights (ENI)
C. Publishing (PUB)
D. Lifecycle Query Engine (LQE)

Answer: C

Question: 7

You are working in a module and want to create a diagram. When you click the Create button, it looks like this:

Why is Diagram not shown on this menu?

Response:

A. Diagram is not in the preferred module content list
B. this type of module cannot contain diagrams
C. the module already has too many diagrams
D. the module is under change control

Answer: A

Question: 8

Why is it important to have the capability to display all types of links within a project's dashboard? (Choose Two)

Response:

A. To provide a comprehensive overview of all project relationships
B. To impress stakeholders with complex visuals
C. To identify potential areas of risk associated with dependencies
D. To facilitate quick access and navigation to linked artifacts

Answer: A,C

Question: 9

How should a user update artifact attributes effectively in a management system?

Response:

A. By making random updates to explore potential outcomes
B. By ensuring all changes align with current project standards and requirements
C. By updating attributes only at the project completion
D. By allowing all team members unrestricted access to modify any attribute

Answer: B

Question: 10

What benefit does automation provide in the analysis and reporting subdomains of project management?

Response:

A. It entirely replaces the need for human decision-making
B. It facilitates faster and more reliable data processing
C. It promotes the use of outdated analysis methods
D. It decreases the overall accuracy of reports

Answer: B
