## Question: 1

What role does PPRC play in managing ShadowImage in an enterprise environment?

Response:

- A. It increases the available storage capacity.
- B. It decreases the data recovery time.
- C. It synchronizes ShadowImage pairs over long distances.
- D. It has no role in managing ShadowImage.

**Answer: C**

## Question: 2

BCM primarily aims to ensure data availability and protection through which of the following?

Response:

- A. Data deduplication techniques
- B. Regular data backup to the cloud
- C. Continuous data replication
- D. Periodic system health checks

**Answer: C**

## Question: 3

Why would an administrator configure PAV aliases in Storage Navigator?

Response:

- A. To increase the number of host-initiated operations that can target a volume
- B. To decrease the storage capacity used by the volume
- C. To create a more complex zoning configuration
- D. To enable better encryption of data paths

**Answer: A**

## Question: 4

---

For effective management of HUR through Storage Navigator, which of the following practices is recommended?

(Choose Three)

Response:

- A. Regularly check the synchronization status
- B. Routinely test failover procedures
- C. Update firmware asynchronously
- D. Monitor journal size and utilization
- E. Configure additional SNMP traps for HUR events

**Answer: A,B,D**

### Question: 5

What best practice should be followed when configuring Dynamic Provisioning pools via Storage Navigator?

Response:

- A. Always use the maximum number of physical drives.
- B. Configure pools based on performance and capacity requirements.
- C. Use a single RAID level for all pools.
- D. Limit the number of pools to ensure simplicity.

**Answer: B**

### Question: 6

When using Storage Navigator for HUR, what is the initial step to configure a remote replication?

Response:

- A. Define the remote storage system
- B. Create a journal group
- C. Select the replication mode
- D. Assign remote ports

**Answer: A**

### Question: 7

---

In Storage Navigator, to establish a ShadowImage pair, one must define the \_\_\_\_\_ as part of the configuration.

Response:

- A. source volume
- B. storage pool
- C. network bandwidth
- D. copy pace

**Answer: A**

### Question: 8

Hitachi ShadowImage creates a \_\_\_\_\_ copy of data for immediate use.

Response:

- A. point-in-time
- B. duplicated
- C. backup
- D. synchronized

**Answer: A**

### Question: 9

How does Hitachi Dynamic Provisioning impact performance in a mainframe storage environment?

Response:

- A. Limiting I/O to the fastest disks available
- B. By distributing I/O evenly across all physical disks
- C. Prioritizing I/O based on user-defined policies
- D. Reducing I/O by compressing data at the block level

**Answer: B**

### Question: 10

Which of the following is a key benefit of the VSP 5000 series regarding data management?

Response:

- A. High-speed data migration between different platforms
- B. Integrated machine learning algorithms

- 
- C. Automated provisioning and management
  - D. Native cloud integration

<b>Answer: C</b>
