Question: 1

What are two primary uses for VXLAN?

(Choose two.)

Response:

- A. Create a Layer 2 overlay on a Layer 3 network.
- B. Create a Layer 3 overlay on a Layer 2 network.
- C. Provide data privacy and security in a datacenter.
- D. Enable Layer 2 connectivity between remote hosts.

Answer: A,D

Question: 2

Which two of the following are associated with a VRF security policy?

(Choose two.)

Response:

- A. a source zone
- B. one or many application names or application set names
- C. a trust zone
- D. block

Answer: A,B

Question: 3

Which concept provides the most granular security options?

Response:

- A. traffic isolation
- B. Microsegmentation
- C. VLAN isolation
- D. security zones

Answer: B

Question: 4

Which two statements are true regarding VLAN tags in a VXLAN overlay?

(Choose two.)

Response:

- A. The source and destination host must use the same VLAN id.
- B. The source and destination host do not have to use the same VLAN id.
- C. The default behavior of a Juniper VTEP device is to preserve the VLAN id.
- D. The default behavior of a Juniper VTEP device is to discard the VLAN id.

Answer: B,D

Question: 5

When QFX5100 series and EX4300 series are in a Virtual Chassis, which two statements are true?

(Choose two.)

Response:

- A. The Virtual Chassis stack scales down to the lowest maximum scaling number between members.
- B. The Virtual Chassis stack scales up to the highest maximum scaling number between members.
- C. The scale capacity of each switch is dependent on the model of the switch.
- D. QFX5100 and EX4300 switches do not form a virtual chassis with each other by default.

Answer: A,D

Question: 6

You have configured a VXLAN overlay using EVPN as a control protocol. You have a site that is dual homed to two PE devices. What happens when the link to the site fails on one of the PE devices?

Response:

- A. The PE sends a withdrawal of its Ethernet Autodiscovery route to remote PE devices.
- B. The PE sends a withdrawal for each MAC address it has learned on the site-facing interface to remote PE devices.
- C. The VXLAN tunnel to the PE is removed from the network.
- D. The PE forwards all traffic it receives for the local site to the PE that is still connected.

Answer: A

Question: 7

When configuring a VXLAN Layer 2 Gateway using Multicast, which two statements are true?

(Choose two.)

Response:

- A. Each VXLAN domain must have a unique Multicast group address.
- B. Multiple VXLAN domains can use the same Multicast group address.
- C. The VNI associated with a multicast group must match for all VTEPs.
- D. VLAN IDs must match on all VTEPs within the same VXLAN domain.

Answer: B,C

Question: 8

Which two statements are true regarding IP fabrics?

Response:

- A. An IP fabric uses Spanning Tree Protocol to avoid loops.
- B. An IP fabric uses routing protocols to avoid loops.
- C. An IP fabric uses standby links for redundancy.
- D. An IP fabric load balances across links for redundancy.

Answer: B,D

Question: 9

To provision a Juniper QFX Series switch using Zero Touch Provisioning, which three components are required?

(Choose three.)

Response:

- A. DHCP Server
- B. a preconfigured device configuration file
- C. a file server
- D. multicast support
- E. a DNS server

Answer: A,B,C

Question: 10

Which two statements are true with MC-LAG?

(Choose two.)

Response:

- A. MC-LAG uses Inter-Chassis Control Protocol (ICCP) to communicate with a remote end point.
- B. MC-LAG uses Link Aggregation Control Protocol (LACP) to communicate with a peer device.
- C. MC-LAG uses Link Aggregation Control Protocol (LACP) to communicate with a remote end point.
- D. MC-LAG uses Inter-Chassis Control Protocol (ICCP) to communicate with a peer device.

Answer: C,D
