# Latest Version: 6.1

## Question: 1

What technique involves analyzing the registration details and history of a domain to gather intelligence?

Response:

- A. Domain pivoting
- B. File hashing
- C. String extraction
- D. Code disassembly

**Answer: B**

## Question: 2

When analyzing intelligence, which cognitive bias involves favoring information that confirms preexisting beliefs or theories?

Response:

- A. Availability bias
- B. Confirmation bias
- C. Anchoring bias
- D. Hindsight bias

**Answer: B**

## Question: 3

Which of the following tools can be used for link analysis in pivoting?

Response:

- A. Maltego
- B. Microsoft Excel
- C. Adobe Photoshop
- D. Google Chrome

**Answer: A**

### Question: 4

What is the role of log repositories in cyber threat intelligence?

Response:

- A. To enhance user authentication methods
- B. To store and organize log data for analysis and threat detection
- C. To increase data transmission speeds
- D. To manage encryption keys

**Answer: B**

### Question: 5

Which of the following are considered pivot points in intelligence analysis?

(Select 3)

Response:

- A. IP addresses
- B. Domain names
- C. File extensions
- D. Email addresses
- E. Screen resolutions

**Answer: A,B,E**

### Question: 6

Which two tools are commonly used in performing pivot analysis for domain investigations?

Response:

- A. VirusTotal
- B. Facebook
- C. PassiveTotal
- D. Microsoft Word

**Answer: A,C**

### Question: 7

Which of the following is a key technique employed in analyzing cyber threat intelligence?

Response:

- A. Data encryption
- B. Trend analysis
- C. Network segmentation
- D. Social engineering

**Answer: B**

### Question: 8

When collecting domain data for threat intelligence purposes, which of the following attributes is most valuable for identifying potential threats?

Response:

- A. The visual design of the website associated with the domain
- B. The registration details and history of the domain
- C. The number of images hosted on the domain
- D. The advertising content displayed on the domain

**Answer: B**

### Question: 9

The first phase of the Cyber Kill Chain is \_\_\_\_\_.

Response:

- A. Weaponization
- B. Delivery
- C. Reconnaissance
- D. Exploitation

**Answer: C**

### Question: 10

Which of the following best describes the concept of "data normalization" in the context of storing threat intelligence data?

Response:

- A. Encrypting data to protect it from unauthorized access

- B. Reducing the amount of data to save storage space
- C. Transforming data into a common format to facilitate analysis and comparison
- D. Compressing data to speed up transmission

**Answer: C**

### Question: 11

What are two important considerations when storing large amounts of threat intelligence data?  
Response:

- A. Data encryption
- B. Speed of data retrieval
- C. File name length
- D. Using only local storage

**Answer: A,B**

### Question: 12

Which of the following is an effective practice for storing intelligence to ensure quick retrieval and analysis?  
Response:

- A. Using proprietary data formats
- B. Implementing a centralized data repository
- C. Storing data in isolated silos
- D. Compressing data files

**Answer: B**
