Question: 1

Which feature of CloudGuard allows for the dynamic enforcement of security policies based on real-time traffic and threats?

Response:

- A. Identity Awareness
- B. Dynamic Shielding
- C. Threat Extraction
- D. Geo Protection

Answer: B

Question: 2

Which software blade provides forensic analysis tools?

Response:

- A. Logging Blade
- B. Identity Awareness Blade
- C. Monitoring Blade
- D. SmartEvent Blade

Answer: D

Question: 3

Can you configure NAT for internal VM's on the Check Point Gateway in AWS?

Response:

- A. Yes, you can add public IP's to the Check Point
- B. No, all the NAT is being done by the ELB
- C. No, the public IPs are defined directly on the instance
- D. Yes, the NAT is only defined for internal LB

Answer: C

Question: 4

When Cloud Security Posture Management discovers non-compliant cloud resources, CloudBot applications perform automated remediations to correct any violations. How true is this statement?

Response:

- A. This is true, however it requires Full Protection access to the Cloud Account to perform automated remediation
- B. This is not true, Cloud Security Posture Management (CSPM) can only report non-compliance and cannot remediate by itself
- C. This is partially true, however the automated remediation is not done by CloudBot applications but it is done by the Security Management Server
- D. This is not true because CloudBot applications are used to provide chat service to respond to non-compliance alerts

Answer: A

Question: 5

Which one of the following is part of the Orchestration Playbook process for creating a new spoke and an automated Security Gateway?

Response:

- A. Transfer of resources to a VPN
- B. An event trigger
- C. Vertical scaling
- D. Communication with the OS

Answer: A

Question: 6

What do Workloads require to automate processes?

Response:

- A. API
- B. CLI
- C. CSP Portal
- D. Shell

Answer: A

Question: 7

In what way does CloudGuard's Identity Awareness feature benefit cloud security?

Response:

- A. By offering discounts on cloud services
- B. By identifying and controlling user access across the cloud
- C. By providing weather updates to optimize server performance
- D. By increasing manual security checks

Answer: B

Question: 8

Which language can be used by users of Cloud Security Posture Management to create custom Security Policies?

Response:

- A. eXtensible Markup Language (XML)
- B. Posture Management Language (PML)
- C. Governance Specific Language (GSL)
- D. JavaScript Object Notation (JSON)

Answer: C

Question: 9

The framework for cloud security consists of five basic components, or pillars. Making small, reversible changes is a design principle of which of these five pillars?

Response:

- A. Reliability
- B. Performance Efficiency
- C. Cost Optimization
- D. Operational Excellence

Answer: D

Question: 10

When using Data Center Objects in a policy and the objects are not updating, what are two steps we can check?

Response:

- A. Verify process is running with 'cloudguard on' and 2. restart the api process with 'api restart'
- B. Verify process is running with 'cloudguard on' and 2. 'test communication' button the Data Center Server object
- C. Reboot the Security Management Server and 2. restart the cloudguard process with 'cloudguard on'
- D. Reboot the Security Management Server and 2. restart the api process with 'api restart'

Answer: B
